EXECUTIVE SUMMARY

AI agents trust GlassesUSA as a store, but can't yet sell its products.

We tested how ChatGPT, Perplexity and Gemini find, describe and sell GlassesUSA, mapped to 4Orty's KPIs: Agent Sessions, Conversion, Attributed Revenue, AOV.

READINESS SCORE

53/100

Partially agent-ready

AI Visibility	2/4
Product data	2/4
Structured data	2/4
Catalog	2/4
Trust & policy	3/4
Transactability	2/4

WHERE YOU STAND

1. Store yes, product no. Named in 9 of 9 "where to buy Rx glasses" answers, but in 0 of 9 running and 0 of 3 blue-light answers.

2. The real price is invisible. An Rx Wayfarer costs $215.50 with lenses; 0 of 6 agent answers stated a complete price.

3. The buy step breaks. Asked to buy one exact Wayfarer, 2 of 3 agents linked a different listing at a different price.

WHAT TO FIX FIRST

1. Complete price and Rx status on every hero product page, as text and data. Medium effort.

2. Agent-ready listings for 4 hero products, and a real answer on the running page FAQ. Low effort.

3. Let verified AI agents through bot protection on product pages. Low–medium effort.

WHY THESE 4 PRODUCTS

Oakley OO9406 Sutro
Big-brand sport sunglasses. Tests whether agents send runners to GlassesUSA.

Muse Elliot
House brand, most reviewed (973). Tests whether agents use GlassesUSA's own proof.

Ottoto Ellsworth
Budget frame sold with blue-light lenses. Tests price and "no prescription".

Ray-Ban RB2140
Iconic frame sold everywhere. Tests the Rx price and the purchase task.

AI VISIBILITY

Named as a store, missing as a product

14/27
shopper questions where GlassesUSA was named

6/24
open questions where GlassesUSA was listed first

5/24
open questions that cited glassesusa.com (ChatGPT: 0 of 8)

NAMED, BY SHOPPER NEED

Shopper question	Named
Best place to buy Rx glasses online	9 of 9 (first in 5)
Cheapest Ray-Ban Wayfarer with Rx	2 of 3
Best sunglasses for running	**0 of 9**
Blue-light glasses under $50	**0 of 3**

Share of voice (24 questions): GlassesUSA 11 · EyeBuyDirect 10 · Zenni 9

"Where is the best place to buy prescription glasses online?"

1. Best Overall Selection: GlassesUSA

Why it shines: It offers one of the largest inventories online, ranging from affordable house brands to major designer names like Ray-Ban, Oakley, and Gucci.

Gemini, P2-GE-R1, excerpt of the saved answer. These wins draw on Forbes, Good Housekeeping and Wirecutter reviews, and every "Shop" link goes to the homepage. On running, agents send the click to oakley.com and Nordstrom.

What to fix: name products on the running page and say who each hero product is for. **KPI:** Agent Sessions

Source: 27 runs, ChatGPT / Perplexity / Gemini, 17 Oct 2026 (ai_visibility_log_glassesusa.csv) | 2/8

PRODUCT DATA QUALITY

Agents can’t see the price a shopper pays

RAY-BAN RB2140 PAGE SHOWS

$191 and “Prescription eligible”

With single-vision Rx sun lenses the pair costs **$215.50**. That total appears only at step 4 of a JavaScript lens funnel.

OTTOTO ELLSWORTH PAGE SHOWS

$54.60, but $78.60 with blue-light lenses

So it can’t answer “blue-light glasses under $50”. No page says “available without prescription”.

WHAT AGENTS SAID (VERIFIED)

Agent, question	Price given for the Rx Wayfarer
ChatGPT, purchase task	$244, from a different listing
Perplexity, purchase task	None: “$191 is not the total”
Gemini, purchase task	A range, “$191–$250+”
Perplexity, cheapest Rx Wayfarer	EZContacts wins at $148.03, frame only

DRAFT: AGENT-READY LISTING, RB2140

Complete pair: from $215.50 with single-vision Rx sun lenses

Prescription: eligible; send it after checkout

Size: 50 mm, one label in URL, title and data

What to fix: publish the complete price and prescription status on every hero page, as text and structured data. **KPI:** Conversion Rate

Source: GlassesUSA PDPs and lens funnel as a guest (17 Oct); P3, P4 and P6 runs; ground truth GS-P6-GROUNDTRUTH | 3/8

STRUCTURED DATA & FEEDS

Good schema, but some agents get an empty page

WHAT AGENTS CAN READ

Yes Price, stock, GTIN and rating per product

Yes Return policy and shipping times

Yes Product lists on collection pages

No Prescription yes/no; price with lenses

No One product group per frame

No llms.txt (404); /sitemap.xml errors

Feed: no GlassesUSA product card in any ChatGPT run, while GUNNAR, Best Buy and Walmart got cards. Feed status can't be seen from outside.

BOT CHECK, 13 USER AGENTS PER PAGE

Product page	Run 1	Run 2
Oakley Sutro	5 of 13	2 of 13
Muse Elliot	2 of 13	2 of 13
Ottoto Ellsworth	2 of 13	3 of 13
Ray-Ban RB2140	2 of 13	3 of 13

Roughly **1 in 5** requests got a challenge page with no product, no price and no data. Googlebot and Bingbot, which feed Gemini and Copilot, were hit in both runs.

Tested from a US VPN address; your logs can confirm by user agent and verified IP.

What to fix: let verified AI agents through bot protection on product pages; add Rx and lens-price attributes and a product group. **KPI:** Agent Sessions

Source: JSON-LD of 4 hero products; crawler test, 2 runs × 4 PDPs × 13 user agents (17 Oct 2026); ChatGPT P3 product cards | 4/8

CATALOG STRUCTURE

The running page asks, but names no product

STRENGTH

36

products listed as data in the HTML a crawler gets on /running-sunglasses (242 in a browser)

TOO BROAD

4,901

items on the blue-light page: every frame, Rx and non-Rx

RUNNING PAGE FAQ

“What are the best running sunglasses?”

The exact question we asked the agents. The answer names no product and no brand, so agents quote Oakley, Goodr and Smith from elsewhere.

Duplicates: the same RB2140 frame sits on several listings ($191, $212, $244), and agents pick the wrong one (slide 7).

PROPOSED: 4 INTENT COLLECTIONS

40rty format: [Category] · [Specific intent]

Blue-light · non-Rx under $80

Sunglasses · running, non-slip

Sport sunglasses · prescription-ready

Ray-Ban · complete Rx pair

Each one maps to a question we tested where GlassesUSA was missing or had no price.

What to fix: answer the running FAQ with named products; one linked listing per frame and colour; launch the 4 intent collections. **KPI:** Agent Sessions

Source: raw HTML vs rendered page, /running-sunglasses and /blue-light-filtering-glasses (17 Oct 2026); P1 and P6 runs | 5/8

TRUST & POLICY

Your 60-day policy is right, its copies are not

STRENGTH: POLICY IN THE DATA

5 of 6

answers stated the 60-day returns correctly. It is in product schema, on /rma and in the help centre. Trustpilot: 141K+ reviews.

GAP: PROMISE VS FINE PRINT

“365-day warranty” on every product page; the T&C give a 50% store credit after day 60.

ChatGPT found it and told the shopper the warranty “isn’t as generous” as it sounds.

GlassesUSA advertises a 60-day return or exchange benefit on its product pages, but its detailed purchase-policy text also specifies a **14-day return window for eyeglasses**.

ChatGPT, P6-CH-R1, excerpt of the saved answer: a “14-day” window no current GlassesUSA page states. Perplexity found the same 14 days in an old indexed copy of your help article.

RISK: LOOK-ALIKE STORE

glassesusa.myshopify.com

A Shopify store titled “glassesusa” with a 30-day policy, cited by Perplexity as a GlassesUSA source. Owner unknown.

What to fix: align the warranty headline with the T&C, a short dated policy page linked from product pages, a re-crawl request; check the look-alike. **KPI:** Conversion Rate

Source: PDP JSON-LD, /rma, help centre and T&C (17 Oct); P5 and P6 runs; live help article checked 17 Oct 2026 | 6/8

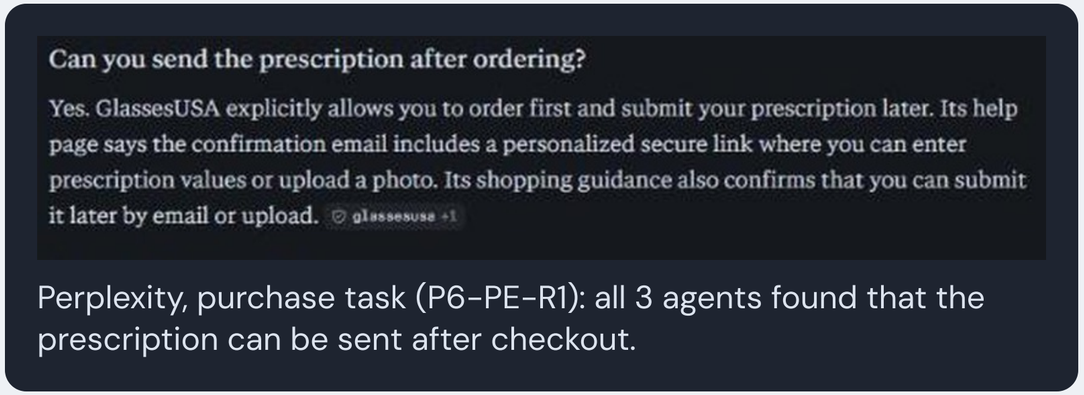

TRANSACTABILITY

Rx can wait, but agents pick the wrong listing

The test: buy the Ray-Ban RB2140, Shiny Black 50 mm, with single-vision Rx sun lenses: stock, total price, send Rx later, returns, exact link. No purchase made.

Step	ChatGPT	Perplexity	Gemini
Exact product link	**No ($244)**	Yes	**No ($212)**
Stock right	No	Unsure	Yes
Total $215.50	No	No	Range only
Rx “Send later”	Yes	Yes	Yes
Returns right	No (14 days)	Yes	Yes

Why: several RB2140 “Shiny Black” listings with different SKUs and prices, and the total exists only inside the lens funnel.

Perplexity, purchase task (P6-PE-R1): all 3 agents found that the prescription can be sent after checkout.

ALREADY IN PLACE

Guest checkout · PayPal and Amazon Pay · Rx “Send later” · the cart URL carries the full lens set-up

Not on Shopify, so no Shop Pay agent checkout; the route is feeds and deep links.

What to fix: one linked listing per frame and colour; a merchant feed with the complete price; a supported deep link to a configured cart.
KPI: Attributed Revenue

Source: P6 agent purchase task in ChatGPT, Perplexity, Gemini; ground truth checked on glassesusa.com as a guest (17 Oct 2026) | 7/8

ACTION PLAN

Do these three first, measure in 30 days

#	What	Why it costs sales	KPI	Impact	Effort	Owner
1	**Complete price + Rx status** on hero pages	0 of 6 answers had the real price	Conversion	High	Med	Ecom, dev
2	**Agent-ready listings** + running FAQ answer	0 of 9 running answers name you	Sessions	High	Low	Merch.
3	**Let verified AI agents** past bot checks	~1 in 5 product fetches blocked	Sessions	High	Low–Med	Security
4	One linked listing per frame and colour	2 of 3 agents chose the wrong RB2140	Conversion	Med–High	Med	Catalog, dev
5	Policy clean-up, re-crawl, llms.txt	Old 14-day copy stalls the sale	Conversion	Med	Low	CX, legal
6	Merchant feed + configured-cart link	No GlassesUSA card in ChatGPT	Revenue	High	Med–High	Ecom ops

HOW WE MEASURE

Re-run the 27 questions, purchase task and bot check 30 days after rows 1–3. Targets: 3 of 9 running answers; complete price 2 of 6; exact link 2 of 3; 0 of 13 blocked.

NEXT STEP

A 20-minute review call to agree on owners for rows 1–3. 40rty then tracks Agent Sessions, Conversion, Attributed Revenue and AOV by agent.

Shaded rows: do first, next 30 days, no replatforming. Effort and owner are estimates to confirm with GlassesUSA's team. | 8/8
