Subject	Vuori × AI shopping agents: your first audit + a 20-min review

Hi [Name],

We tested how ChatGPT, Perplexity and Gemini find, describe and sell Vuori. Good news first: agents already like you. Vuori was recommended in 22 of 27 real shopper questions and named first in 9.

Three things are holding back sales from these agents:

1. They learn about Vuori from magazines and Reddit, not from you. Your own site was a source in 1 of 24 answers, and some product facts came back wrong.
2. Your product feed undersells you. ChatGPT shows the Sunday Jogger with 3,547 reviews; your site has 14,596.
3. The buy step breaks. Asked to buy an exact Sunday variant, 0 of 3 agents gave a checkout-ready link.

The first fixes are mostly content and feed settings, low effort, and we can measure the change in 30 days.

The full audit is attached. Could we take 20 minutes this week to walk through it and agree on owners?

Best,
[Your name]
